

AMENDMENTS TO THE CLAIMS

Please amend the claims as follows:

1. A theater complex domain comprising:

a projection unit operable to render decompressed digital video content;

a security module having a decompression unit operable to receive compressed digital video content and to produce the decompressed digital video content;

the compressed digital video content received by the decompression unit comprises unencrypted compressed digital video content, and the decompressed digital video content rendered by the projection unit comprises unencrypted decompressed high bit-rate digital video content; and

the security module having a decryption unit for receiving encrypted compressed digital video content and to produce the unencrypted compressed digital video content.

2. A theater complex domain as in claim 1,

wherein the security module further comprises:

a watermark unit coupled to the decompression unit operable to receive the decompressed digital video content produced by the decompression unit and to produce the decompressed digital video content rendered by the projection unit,

wherein the decompressed digital video content rendered by the projection unit includes a watermark embedded therein.

3. A theater complex domain as in claim 2,

wherein the watermark uniquely identifies the projection unit to which the security module is removably coupled.

- 4 5. A theater complex domain as in claim 1,

wherein the security module is physically locked in a tamper resistant container.

- 5 6. A theater complex domain as in claim 4 5,

wherein the security module is physically locked to the projection unit to which it is removably coupled.
